

24th January 2013

6th meeting

We have met two times today. At the first meeting, everyone presented and, the second one was for brainstorming and talking about the project idea.

Ideas:

- Fish's and polip's feature - anti aging and not to cut the "telomer"
- Bacteria that, using arsenik and light to produce nutrice for them selves
- RRAA(for safety)
- Radiation resistant bacteria(via so fast DNA repair)
- GFP for tumor cell's early detection
- Bacteria, products myelin for norodegerative illnesses
- Optogenetic
- Xeroderma pigmestosum and DNA repair
- Magnetic bacteria, (magnetic area impress their taxis)(taivan-2011)
- Bacterial cream
- The smell
- CDT alcohol dependence test via bacteria
- Sound sense bacteria
- 26th january 2013
- 9th meeting
- We planned workshop and two presentation for human practise.
- Esin, did a presentation about bacterias' system.
- Mikail did a presentation too.
- We just started to read articles. That was too hard.
