

29 haziran

In the morning Mustafa abi, gave a talk to introduce us to the laboratory. We then began to clean the lab; it was soo tiring but worth it in the end as it was as clear as a crystal. We obviously was really hungry so had some large pizza. Then the presentations for igem high school students began so we watched our team presenting; they were just excellent!

30 june

We started the new iGEM season, today. Hope this season willl be great for us.
