

# **HZAU IGEM meeting record for the seventh time**

Attendants: Le Xiong, Jian Wan, Wei Wu, Yunchuan Li, Shaowei Zhang, Ping Hong, Jing Chen, Liu Tian, Linfeng Ding, Xianlin Zou, Tao Bai, Mian Yang, Xin Tan

## **1. The discussions of experimental group**

Le Xiong:

Component selection: ① use our own components and then make these standard; ② use components provided by MIT

New strain: *Bacillus subtilis* can express something to kill gram-negative bacteria

New problem: how to simulate the body environment of fleas

## **2. Adjust our meeting**

- ① There will be the overall frame diagram for our meeting.
- ② Begin to use English as the main language in the next meeting.
- ③ Web-page group's overall flow chart and the circuit diagram of biological experiments should be shown out by pictures.

## **3. Expectation and allocation for our tasks**

- ① Investigate the background of rabies
- ② Investigate G protein and biofilm
- ③ Collect information of flea stomach environment
- ④ Investigate the background of the biofilm
