

Part Number	Where did you get the physical DNA for this part (which lab, synthesis company, etc)	What species does this part originally come from?	What is the Risk Group of the species?	What is the function of this part, in its parent species?
BBa_K1114200	Amplified from a plasmid	Genomic DNA from E. coli K12 MG1655 Derived from FRET proteins		1 Spectinomycin resistance gene (aadA)
BBa_K1114207	AddGene plasmid #14030			1 CyPet fluorescent protein
BBa_K1114209	iGEM distribution kit (originally BBa_E0040)			1 Green fluorescent protein
BBa_K1114211	iGEM distribution kit (originally BBa_E1010)			1 Red fluorescent protein
BBa_K1114212	iGEM distribution kit (originally BBa_E1010)			1 Red fluorescent protein
BBa_K1114213	iGEM distribution kit (originally BBa_J31005)	Aequorea victoria Discosoma striata		1 Chloramphenicol acetyltransferase
BBa_K1114214	AddGene plasmid #29771			1 mCitrine fluorescent protein
BBa_K1114215	AddGene plasmid #29770			1 mOrange fluorescent protein
